

Ryan Bibby

Full-Stack Developer

👤 Profile

Experienced full-stack developer with strong attention to detail. Always thinking about the business impact, the end user and trying to make people's lives easier through the applications I build.

💼 Employment History

PHP Developer at UKFast / ANS Group

February 2020 — Present

- Saved the business an estimated 'tens of thousands of pounds' from reduced processing fees by implementing 3D Secure on all customer-facing payment systems
- Led and implemented payment processing in the client portal for initial order payments from Salesforce integrating with Sage Pay / Opayo
- Reduced support tickets by 89% and increased deployment reliability by 106% by implementing version 2 of the companies load balancer product with improved UI / UX and validation
- Delivered training across the team (including juniors and seniors) on various topics including TailwindCSS, Webpack, and Laravel Mix
- Created packages for common logic on the businesses service-oriented APIs which were then used by other product teams within the business
- Management of technical debt & upgrading projects to the latest versions
- Ran daily stand-ups, assigned work, and onboarded new employees when the team leader was off

Junior PHP Developer at UKFast / ANS Group

September 2019 — February 2020

- Implemented the biggest redesign the client portal had received behind feature flags without regression including making the support area more user-friendly and fully responsive
- Devised and created a style guide for the client portal to ensure all developers had a consistent set of design components to use

Apprentice Software Developer at UKFast / ANS Group

February 2016 — September 2019

- Creating APIs needed for iOS and Android applications
- Bug fixes and developing new features for the client portal

Apprentice Software Developer at Bright Future Software

September 2014 — January 2016

- Managed a team of apprentices on a small commercial project
- Completed coursework assignments

🎓 Certifications & Professional Qualifications

CompTIA Project+ February 2022

Level 4 Software Developer Apprenticeship 2016 — 2019

Level 3 Software Developer Apprenticeship 2014 — 2015
